2 Friends and Friendship

I think there is not the friend. Everybody has lots of friends and the all are totally different, but import for our personality. I, for example, have friends in my sport club. There are not my best friends, but it makes much fun to hang around with them. Also in school i have my friends. With many of my schoolmates I have a good amity too. But closly everybody on the world as one, two, or three best friends, who you talk to in a completely different way. Like the author A.A. Milne said once: "It is more fun to talk with someone who doesn't use long, difficult words but rather short, easy words like "What about lunch?"

A good friend is a person you can trust and who takes care of you and you of him. In my situation it looks a bit different at the first glance, but really same at the second.
